

LAB : Creating Forms

Create a form with these fields:

- first name
- last name
- email
- password
- dob: date
- gender: radio
- state
- country
- pincode: number with min and max attributes
- *exam date: read-only field showing today's date*
- exam slot: time
- *I have read the terms and conditions* - checkbox
- submit button
- reset(clear) button

The form should have a heading(h1) at the top - "Examinee Details".

The title of the webpage should be "Roadies Exams".

After the form, there should be a disclaimer with a paragraph of text saying - "All the drama in this show is scripted".

Below is the screenshot of the output:

Examinee Details

First name:

Last name:

Email:

Password:

Date of birth:

Gender: ☐ Female ☐ Male ☐ Other

State:

Country:

Pincode:

Exam date:

Exam slot:

☐ I have read terms and conditions

Disclaimer:: All the drama in this show is scripted

Total Points : 20

Deliverables :

1. Screen shot of code and resultant page
2. Html file with the dependencies (if any)

Rubric :

Criteria	Excellent (5 points)	Good (4 points)	Satisfactory (3 points)	Needs Improvement (2 points)	Poor (1 point)	Unacceptable (0 points)
HTML Structure	HTML is well-structured with proper use of	HTML is mostly well-structured with some	HTML structure is acceptable but lacks clear	HTML structure is partially correct but	HTML structure is poorly formed and	HTML is completely disorganized and lacks any

Criteria	Excellent (5 points)	Good (4 points)	Satisfactory (3 points)	Needs Improvement (2 points)	Poor (1 point)	Unacceptable (0 points)
	semantic tags and elements.	room for improvement in semantic tagging.	use of semantic tags.	has significant issues with organization and semantics.	hinders readability.	meaningful structure.
Form Fields Implementation	All form fields are implemented correctly with appropriate HTML elements and attributes.	Most form fields are implemented correctly, with minor issues in one or two fields.	Form fields are present, but there are notable issues with implementation.	Some form fields are incorrectly implemented, impacting functionality.	Form fields are attempted but not successful.	No form fields are implemented.
